

Specifications:

Location: Honolulu, HI

Date Completed: Fall 2008

System Size: 120kW DC / 100kW AC

Modules: 576 Suntech STP210

Inverters: 1 PVPowered PVP100

Description:

The 120kW solar electric facility is attached to the flat roof of an open air pavilion at the school. The system consists of 576 solar modules and one 100kW inverter which delivers electricity to the school's electrical grid, providing power to the entire campus where needed. The system generates over 180,000kWh of electricity annually.

The school avoids generating thousands of tons of harmful emissions such as carbon dioxide, nitrogen oxide and sulfur dioxide by purchasing the clean, renewable energy from this energy facility. This renewable energy facility is owned, operated and maintained by Island Pacific Energy and the power generated is sold to the school at a competitive rate.
